Re-Occupancy

ACTION PLAN

ARE YOU READY TO RE-OPEN?

Preparing your facility and interim operations for your day to day return with the serious responsibility of protecting your employees and customers health, it is important to consider the following:

1 Cleaning & Disinfecting

Prior to re-occupancy and possibly periodically thereafter it may be necessary to clean and apply disinfect to interior occupied spaces, furnishings and mechanical systems.

3 Certified Specialists

Why would you use your employees or a janitorial company instead of an Infection Control Risk Assessment (ICRA) service provider? Providing the right cleaning chemicals, safety equipment and supervisors needed is the key to a clean and healthy environment.

5 Ongoing Partnership

We can also provide ongoing cleaning services and products to help maintain your operations keeping your employees, tenants, customers and guests safe.

2 Manage Risk

- Focus on breaking the chain of transmission, maintaining environmental conditions is of primary importance.

4 Reduce Downtime

- Our deep cleaning services and applying disinfectant at your facility will help reduce the risk of infection or illness, cross contamination and downtime in business.
